

## AALTONEN MOTORSPORT HIGH PERFORMANCE DRIVING ON ICE AND SNOW

**Aaltonen Motorsport** organizes in the scenic Tahko winter sport resort a dynamic driving event, which will be exciting to any driver. We will be driving on a frozen lake amidst untouched nature. We will drive on the limit on both **Ford Focus** ice training cars and **BMW** ice racers not to forget the **fastest Mini of all - Cooper "S" with the John Cooper Works Kit**. Equipment like ours you will not find elsewhere in Scandinavia.

We will start the day with a comprehensive and interesting theory about driving dynamics and continue by real driving on ice to learn the secrets of the professionals. You will drive with the ice racing tyres studded with very long spikes, experience the spinning wheels sending pieces of ice flying just like a rally car throws rocks and dirt in summer. You will test the limits of the car and your own skills and certainly learn new tricks. There will be a fight against the clock to become the Speed Hero of that vast lake area.

The Master of the events will be **Tino Aaltonen**, who became famous as the fastest saloon car racer in Finland and was running his own very successful racing team as well. He also has a long time experience in training both racing and rally drivers, twenty years improving good people from one-to-one sessions to larger groups and manufacturer organized trainings. His remarkable results with his students are well known.

The Aaltonen School is based on the unique training methods of Tino's father **Rauno Aaltonen**, the Rally Legend, known all over the world with the nickname "Professor". He was the founder of the BMW Driver Training and he made the Mini Cooper famous by winning the Rallye Monte Carlo and by driving in the untouchable BMC Mini Rally Team. Since then he has competed in rallies and on racing circuits in nearly anything on four wheels in incredible 127 different countries.

Due to the small groups they will have an individual supervision of every participant.

**You will spend more time behind the steering wheel than anywhere else in Europe.**

### PROGRAM FOR EVENT

A typical program that can be tailored to suit your targets and wishes.

10.00

#### Theory

- welcome coffee with snacks while attending a comprehensive theory session of driving dynamics
- correct adjustment of the seat, controlling the steering wheel, the general dynamics, under steering and over steering, throttle control, front wheel drive versus rear wheel drive, mastering tricky situations, etc.

#### Ice Training on a Frozen Lake

- Ford Focus ice training cars
- BMW 325i ice racing cars
- Mini Cooper S with the John Cooper Works Kit

13.00

#### Lunch Brake

#### Ice Training Continues ....

#### Race against the Clock, have Fun and new Experiences

16.00

#### End of the day and prize giving ceremony

## Winter 2012

- The Fleet** Ford Focus and BMW Ice racing cars specially converted and tuned for the Driving Events by Aaltonen Motorsport  
Mini Cooper S equipped with the John Cooper Works Kit
- Including** The day includes coffee and croissant, lunch, theory, driving outfit, use of the cars, fuels, use of the ice tracks and prizes. Our Race Service Truck provides hot drinks.
- Price** 495 € / person (incl. Finnish VAT 23%), minimum 6 persons. Please, ask an offer for smaller groups.

Aaltonen Motorsport provides suitable driving outfit, you should just bring your own foot wear, suitable for driving but warm, normal winter clothing and happy holiday feelings.

- When** The best conditions for a winter event are in January, February and March.  
Thick ice, white snow and shining sun with clear sky subject to weather.

Every participant takes part under his/hers own risk and responsibility.  
Personal travel insurance is recommended.

**You heartily welcome!**
